TYCO ELECTRONICS INTRODUCES THE ELO TOUCHSYSTEMS 1519L and 1919L WIDE-ASPECT TOUCHMONITORS.

-- New Touchmonitors Deliver Style and Functionality to Rugged Environments Like Point-of-Sale (POS), Point-of-Information (POI), Interactive Digital Signage, and Kiosk Information Systems --

HARRISBURG, Pa. – Jan 12, 2010 – — Elo TouchSystems, a Tyco Electronics business, brings high-performance LCD panels together with the industry's leading touch technologies to create new wide-aspect touchmonitors.

The two new touchmonitors are 15 and 19 inches and are well suited for public venues such as point-of-sale (POS), point-of-information (POI), point-of-service, interactive digital signage, loyalty systems, kiosk information systems, light industrial shop-floor automation and home control. Both touchmonitors are built to withstand the rugged and sometimes punishing commercial or public environments where many people use them. Personal computer monitors that have not been ruggedized may not last long in these types of environments.

Both touch monitors are available in three industry-leading Elo touch technologies:

1. Zero-bezel APR — touch is sensed on the display when the unique pattern of sounds is recognized. It has the advantage and durability of pure glass, works with any input device – finger, glove, pen, credit card, etc. – and is resistant to water, dust, and grease.
2. Standard-bezel IntelliTouch surface acoustic wave — uses pure-glass touchscreens for excellent clarity, resolution, and light transmission. It has a durable, scratch-resistant glass surface, delivers stable, no-drift calibration performance and can be activated by a finger, gloved hand, or soft stylus.
3. Zero-bezel AccuTouch 5-wire resistive — delivers stable, drift-free operation. It has broad input flexibility, is contamination resistant and is accurate for high-use applications.

“The wide-screen format of both touchmonitors provides more space to display your applications and they can also be used in portrait mode,” said James Witkowski, Elo product manager, “Zero-bezel touchmonitors are as practical as they are beautiful. The easy-to-clean screen surface is resistant to water, dust and grease, making it an excellent choice for use in a public environment.”

If you would like more information about these products, visit the Elo website www.elotouch.com/product/LCDs, contact your Elo distributor, call Elo TouchSystems Customer Service at 800-557-1458 or send an inquiry to customerservice@elotouch.com.

About Tyco Electronics

Tyco Electronics Ltd. is a leading global provider of engineered electronic components, network solutions, specialty products and undersea telecommunication systems, with fiscal 2009 sales of US\$10.3 billion to customers in more than 150 countries. We design, manufacture and market products for customers in a broad array of industries including automotive; data communication systems and consumer electronics; telecommunications; aerospace, defense and marine; medical; energy; and lighting. With approximately 7,000 engineers and worldwide manufacturing, sales and customer service capabilities, Tyco Electronics' commitment is our customers' advantage. More information on Tyco Electronics can be found at <http://www.tycoelectronics.com/>.

About Elo TouchSystems

Tyco Electronics' Elo TouchSystems is the global leading brand in touch technology. The Elo TouchSystems portfolio encompasses the largest selection of touchscreen technologies, touchmonitors, and all-in-one touchcomputers for the demanding requirements of diverse applications, such as industrial, medical, POS, kiosks, retail, hospitality, transportation, office automation and gaming. Elo founders invented the touchscreen over 35 years ago. Since then, Elo touchscreens have delivered one common, powerful result - advanced computer technology simplified for all users. For more information on Elo products and services, please contact 800-ELO-TOUCH (800-356-8682), or view Elo products website at www.elotouch.com or direct electronic mail inquiries to customerservice@elotouch.com.
